

MD. SHAHRIAR HOSSAIN

WordPress Developer | Elementor, ACF & WooCommerce

+880 1828 447489 (Cell & WhatsApp) · shahriaremon971@gmail.com · shahriaremon.xyz · linkedin.com/in/shahriar971

4 yrs experience · 150+ sites delivered · 5 WooCommerce stores · 80+ PageSpeed, desktop

SUMMARY

WordPress developer, four years of agency work, 150+ client sites delivered. Mostly US dental and medical practices, built in Elementor from Figma files on a clean Astra install, with no starter templates or theme demos. Two and a half years at the current agency, where the role now covers training the new junior developers. ChatGPT, Claude, Gemini and Qwen are part of my daily workflow, which has noticeably cut build and debugging time.

SKILLS

WordPress & Frontend: WordPress, Elementor Pro, Astra, HTML5, CSS3, Figma-to-WordPress, Responsive Design, Custom WordPress Builds

Dynamic Content: ACF, Custom Post Types, Elementor Theme Builder, Loop Grids, Dynamic Tags

WooCommerce: Product, Cart & Checkout Templates, Variable Products, Payment Gateways, Shipping Rules

Performance: WP Rocket, Caching, CSS Optimization, Lazy Loading, CDN, WebP Images, PageSpeed Optimization

AI-Assisted Development: ChatGPT, Claude, Gemini, Qwen — CSS/JavaScript snippets, Debugging, Code Review, Content Drafts

Security & Hosting: Plugin Audits, User Roles, Login Hardening, Backups, cPanel, Migrations, SSL, Staging

Tools: Git, GitHub, ClickUp, Slack, Discord, Basic On-Page SEO

Mentoring: Junior Developer Onboarding, Build Conventions, Work Review, QA Preparation

EXPERIENCE

Software Engineer (WordPress), Orangetoolz, Dhaka

2024 – Present

- Build responsive WordPress websites in Elementor from Figma designs, using clean Astra setups without starter templates or demo imports, and test layouts across different screen sizes down to 320px.
- Work with Design, QA, Engineers and Project Managers to implement designs, fix layout issues and complete website tasks within project timelines.
- Set up ACF fields and Custom Post Types for team members, services, case studies and other dynamic content, using Elementor Theme Builder, Loop Grids and Dynamic Tags.
- Handle QA fixes, previous-project revisions, content updates and pre-launch checks, making sure pages match the approved design and work properly across devices.
- Work on website performance using WP Rocket, WebP images, lazy loading, CSS optimization, caching and CDN, and check PageSpeed performance during development.
- Help onboard junior developers by explaining WordPress/Elementor build structure, naming conventions and responsive implementation, and review their work before QA.
- Use ChatGPT, Claude, Gemini and Qwen for CSS/JavaScript snippets, debugging, code review, content drafts and QA checklists, with all AI-assisted changes reviewed and tested before use.

Junior Web Developer, Center of Digital Marketing, Dhaka

2023

- Built and edited WordPress pages in Elementor, fixed broken breakpoints, set up hosting, domains and SSL through cPanel.
- Maintained live client sites: plugin updates, backups, layout fixes.

PROJECTS

All custom-built from Figma to Elementor, with custom post types and ACF behind the dynamic sections.

- **Okuda Orthodontics** · okudaortho.com — Orthodontic practice, Henderson NV; treatment pages and location listings on CPT and ACF.
- **Park City Smiles** · parkcitysmile.com — Dental practice; Elementor Theme Builder templates for treatments.
- **EC Foot & Ankle** · ecfootankle.com — Podiatry clinic; provider and condition listings as custom post types.
- **Braces World** · bracesworld.com — Orthodontic practice; treatment listings through loop grids.

EDUCATION

MSc, Computer Science & Engineering, Jahangirnagar University

2022 – 2024

BSc, Computer Science & Engineering, Daffodil International University

2016 – 2020
